ENHANCE YOUR
ELECTRICAL CAREER

Basic Electrics

An Introduction to the Electrical Industry

The Basic Electrics course has been designed for beginners and those with no experience or knowledge of working in the electrical industry.

As an introductory course it begins with the basics allowing candidates and learners to build up their knowledge of electrics so they are able to move on to study further qualifications at higher levels.

Although this course is not entirely essential for beginning in the electrical industry, it is a wise choice as a first step; it will allow learners a basic understanding which will help for further more complicated higher level courses.

Some higher level courses can be difficult without a prior understanding of electrics. When beginning that first step, this course is a good starting point.

Who is the Course Designed For?

This basic course is most suitably recommended for anyone who has not previously completed any electrical qualifications and beginners who would like to use this course as a step to further higher level qualifications.

What Does the Course Cover?

All parts of this course will teach and cover the basics of electrics, highlighting the essentials of electricity and showing how to complete simple electrical tasks in a safe and competent way.

As a part of the course, learning subjects include the following:

- Basic principles of electricity
- Classification of appliances
- Electrical changes
- Legal requirements
- IET Wiring Regulations
- Recording results

Domestic Electrical Installer Packages

Become a Domestic Electrical Installer in 16 non-consecutive days with PASS Training's Course Packages. Each package contains the essential courses needed to get you fully qualified.

Did You Know?

The Basic Electrics course is the first specified course in both our Domestic Electrical Installer Course Packages. Studying via a course package can save you money on buying courses individually.

Three Day Course

Price: £399+VAT (per person)

Location: Stockton, Watford
(London)

An Introduction to the Electrical Industry

Three Day Course

Price: £399+VAT (per person)

Location: Stockton-on-Tees, Watford (London)

What Assessments Are There?

Once the learning modules are completed the course will be assessed by theory and practical assessments.

Are There Any Entry Requirements?

There are no pre-requisites or formal entry requirements required for the basic electrics course except an interest in the subject matter.

What Are The Reading Requirements?

It is recommended that learners read and bring with them:

- Electricians Guide to the Building Regulations,
- IET 17th Edition Wiring Regulations, Amendment No. 1,
- IET On-site Guide, Amendment No. 1.

Final Thought

If you are interested in this course and would like to find out more about the content, other courses on offer or would like to find out more information about PASS itself and the facilities available to you, contact the training centre where an advisor will be happy to answer all your questions.

Don't forget: lunch is provided on all our courses along with Coffee, Tea and Juice.
