ELECTRICAL CAREER

EAL 4337 Initial Verification

Level 3 Award in Initial Verification and Certification of Electrical Installations

The EAL 4337 course allows industry professionals to learn and develop skills of inspection and testing to include initial verification of installations.

It is the ideal solution for those wanting to develop existing skills and those wanting to move their career to the next level. As a level three qualification, the 4337 is highly respected and recognised, and follows BS7671, IET's Guidance Note 3 and the best practice guides developed by Electrical Safety First.

Once completed, successful learners will be able to understand theoretical and practical elements for both single and three phase electrical installations.

Who is the Course Suitable For?

Those who want to carry out initial verification inspection and testing as part of their main job, or as an addition to their main job, can complete this course to allow them to do so.

What Does the Course Cover?

The main course programme is four days long in total and covers the theoretical and practical elements of initial verification and certification of electrical installations. The main topics covered include:

- Isolating electrical circuits and installations safely
- Initial verification of electrical installations
- Carrying out inspections on electrical installations before service
- Testing and commissioning electrical installations safely
- Testing before circuits are energised
- Testing energised installations
- Completing electrical installation certificates and documentation
- Ensuring safe systems and equipment before work
- Inspecting electrical installations before they are in operation
- Commissioning electrotechnical systems and equipment

Each topic covered in the programme aims to ensure a thorough understanding of the subject matter to allow learners to successfully carry out work using these new skills.

EAL Accredited Centre

EAL is the specialist, employer-recognised awarding organisation for the engineering, manufacturing, building services and related sectors.

Did You Know?

The EAL 4337 Initial Verification course can be taken as a combined course package with the EAL 4338 course, allowing you to gain two qualifications from one single course programme incorporating the 4337 and 4338.

Six Day 4337 & 4338

Price: £995+VAT (per person)

Location: Stockton-On-Tees
and Watford

EAL 4337 Initial Verification

Level 3 Award in Initial Verification and Certification of Electrical Installations

Six Day Combined EAL 4337 & 4338

Price: £995+VAT (per person)

Location: Stockton-On-Tees and Watford

What Assessments Are There?

The assessments for the 4337 consist of an online exam and practical assessment on the principles, practices and legislation for initial verification of electrical installations.

Both parts of the assessment will need to be passed to successfully complete the course.

Are There Any Entry Requirements?

Learners wanting to study this course will need to have industry experience in inspection and testing, and knowledge of the 17th Edition Wiring Regulations would be useful.

What Are The Reading Requirements?

Information in the following publications will be referred to during the course and may be useful to purchase:

- IET Inspection and Testing Guidance Note 3 (inc. Amendment 1)
- IET On Site Guide BS7671:2008 (2011)
- IET Wiring Regulations (Amendment 1: 2011)

Final Thought

If you are interested in this course and would like to find out more about the content, other courses on offer or would like to find out more information about PASS itself and the facilities available to you, contact the training centre where an advisor will be happy to answer all your questions.

Don't forget: lunch is provided on all our courses along with coffee, tea and juice.
