

OVER 20 COURSES  
TO ADVANCE &  
ENHANCE YOUR  
ELECTRICAL CAREER

# Electrical Heating and Boiler Controls

Designed for Electricians to Install and Commission Electrical Heating Control Systems

If you work in a field or industry which requires you to maintain a domestic heating system, this course is ideal to suit your needs.

Electricians and Domestic Electrical Installers are the main candidates this course aims to help with a new skill in electrical heating and boiler controls.

## Who is the Course Designed For?

This course is most suitable for practising Electricians and Domestic Electrical Installers who would like to add heating and boiler controls to their existing skills.

## What Does the Course Cover?

Learners will study relevant health and safety requirements in relation to heating control systems and regulations.

Looking at the different types of heating systems and the control devices used to operate them, this course will allow a thorough insight into heating controls.

## Learners will cover the following:

- Different types of heating systems and control devices,
- Wiring and heating controls,
- Installing a common heating control system,
- Fault finding techniques.

## Domestic Electrical Installer Packages

Become a Domestic Electrical Installer in 16 non-consecutive days with PASS Training's Course Packages. Each package contains the essential courses needed to get you fully qualified.

## Did You Know?

The Heating and Boiler Controls course is a specified course in the Advanced Domestic Electrical Installer course package.

## One Day Course

Price: £195+VAT (per person)

Location: Stockton-on-Tees
