

ECITB Leading a Team Safely

This single-day workshop is made for those who will be leading and managing small teams within the Engineering Construction industry.

A health and safety course, Leading a Team Safely focuses on developing your understanding of health and safety when working on-site and how to apply this to ensure the safety of both yourself, those you manage and others working around the site.

Who is the Course Suitable For?

You should be responsible, or are going to be responsible, for the health and well being of small teams working within the engineering construction industry.

Those attending this course must have a valid CCNSG Safety Passport with at least 3 month's expiry on it.

What's Covered in the Course?

The workshop will focus on a number of key topics, including:

- > How to Communicate Successfully
- > How to Lead a Team Successfully
- > How to Achieve Safe Outcomes
- > Self-Management
- > How to Work Safely with Others

The course is designed to be highly interactive; your participation throughout the course is a key element during the day in order to ensure you are engaged and to reinforce the course content.

CCNSG Leading a Team Safely is based heavily around the concept of 'The Good Job.' This refers to ensuring health and safety is part of your day-to-day routine when on-site, with course content defined into four elements based around this:

- > The Team
- > The Plan
- > The Job
- > Good Job

Did You Know?

We also offer the ECITB's National Safety Passport and National Safety Passport Renewal courses.
