

CITB Site Management Safety Training Scheme (SMSTS)

Ensure the health and safety of all of your employees within a construction environment by taking this dedicated management training course.

This course will help you to understand how to manage safety on-site much more effectively and to understand the potential issues that ignoring health and safety could cause.

Who is the Course Suitable For?

This course is designed for project managers, site managers, supervisors, business proprietors and client-based personnel with responsibility for others within a construction environment.

What's Covered in the Course?

Over the course of five days, you'll take part in case studies, classroom discussions, group work and individual/group presentations focussed on health and safety within the construction sector.

You will also be expected to undertake some self-studying as part of this course.

Topics covered during this course include:

- The Health and Safety at Work Act
- Construction Design and Management (CDM) Regulations
- Risk assessments/method statements
- Recent changes in accepted working practises
- Behavioural safety
- Management of occupational health
- Electricity
- Excavations
- Working at height
- Scaffolding
- Demolition
- Confined spaces
