

City & Guilds 2391-51

Level 3 Award in Periodic Inspection and Testing of Electrical Installations

With this course, you can gain the necessary knowledge to safely perform periodic inspections and testing of electrical installations.

A fully accredited City and Guilds electrical training course, 2391-51 covers both the theory and practical work required to test and verify electrical installations and is an excellent course for any practising electrician who would like to work more closely with electrical installations.

Who is the Course Suitable For?

This course is recommended for practising electricians who are yet to perform initial inspection on electrical installations, or those with previous experience in this field looking for an update on their previous training. It is recommended that you take the City and Guilds 2391-50 Verification course before attending this training (both courses are also available as a combined package).

What is Covered in the Course?

City and Guilds 2391-50 is both a theory-based and a practical course; you can both expect to be in the classroom carrying out important theory based on initial verification and you can also expect to gain practical experience on our in-house electrical training bays.

Taught by our experienced, friendly and helpful electrical training tutors, we will guide you through all of the modules and prepare you as much as possible for the examinations and practical assignments you will have to complete at the end of the course.

This course aims to:

- Make sure you understand the requirements for periodic inspection and testing
- Make sure you understand the safety management procedures when undertaking periodic inspection and testing
- Make sure you understand the requirements for the periodic inspection of an electrical installation
- Make sure you understand the requirements for testing electrical installations during periodic inspection and testing
- Teach you how to perform periodic inspection and testing of

City & Guilds Accredited Centre

City & Guilds are represented in over 100 countries worldwide as a vocational awarding body for qualifications.

City & Guilds 2391-51

Level 3 Award in Periodic Inspection & Testing of Electrical Installations

5 Day Course

Price: £555+VAT (per person)

Locations: Stockton, Watford (London)

What Assessments Are There?

This course includes a multiple choice examination (40 questions - 80 minutes), a short answer test (1 hour) and a practical test (2 hours).

Are There Any Entry Requirements?

There are no prior qualifications required to attend this course. We do recommend that those interested in this course have basic knowledge and understanding of electrical science and/or principles/experience of electrical installation work.

What Are The Reading Requirements?

We recommend purchasing a copy of the IET Wiring Regulations and IET Guidance Note 3 for use on the course. Both books can be used during the course and during the open book examinations.

Final Thought

If you are interested in this course and would like to find out more about the content, other courses on offer or would like to find out more information about PASS itself and the facilities available to you, contact the training centre where an advisor will be happy to answer all your questions.

Don't forget: lunch is provided on all our courses along with Coffee, Tea and Juice.
