

Safe Access to High Voltage Substations and Switch Rooms

This training programme is designed for electrical and non-electrical personnel with no previous experience of electrical HV power systems, who require substation/switchroom access for defined duties.

Who is the Course Suitable For?

Best suited for electrical/non-electrical personnel with no previous experience of electrical power systems, who require access to areas containing High Voltage Electrical Apparatus with a view to undertaking specific duties e.g. meter reading, cleaning, painting etc.

What's Covered in the Course?

The course covers the safety requirements for working in the vicinity of high voltage electrical equipment, highlights electrical hazards and outlined the precautions necessary to avoid danger.

It also covers the arrangement of equipment within substations and switchrooms, in addition to safety procedures, understanding of key safes and multihasp systems and steps to be taken in an emergency.

The following is covered as part of this course:

- Safety requirements
- Electrical hazards and precautions
- Arrangement of high voltage substations
- Basic high voltage safety procedures
- The role of protective relays
- Emergency conditions
- Demonstration of switchgear principles
- Electrical incidents
- Course review
