Limited Safe Switching of HV Power Systems (Refresher Course)

Refresh your HV operational knowledge with this course which is designed to reinforce your existing experience of routine switching operations and issuing of isolation documents associated with single end drive circuits.

Through a mix of classroom-based and practical exercises, you will refresh your knowledge of safely operating high voltage systems and be able to safely perform routine switching operations/issue isolation documents.

This course is recommended for those who have previously worked in the high voltage industry, but may have moved into other fields before getting back into HV work. It is also recommended for authorised persons as a means to refresh your knowledge and ensure you are working to all current regulations.

The course includes the following sections:

- Hazards of Electricity
- Electrical Statutory Regulations
- Operational Procedures
- Abridged High Voltage Safety Rules
- Causes of Electrical Accidents
- Case Studies
- Safety Documents and Lockout/Tagout
- Practical Switching Exercises
- Course Review
