

Practical Introduction to the Safe Operation of High & Low Voltage Switchgear (Up to 15kV)

Learn the basics of safely performing high and low voltage switching with this hands-on, practical training course.

Who is the Course Suitable For?

This course is made for both electrical and non-electrical personnel who require practical, hands-on experience of switching and issuing of safety documents on power systems up to and including 15kV.

You should take this course before taking the full HVSO4 course (Safe Operation of High Voltage Power Systems - Full HV Switching Authorisation).

What's Covered in the Course?

Taking place mainly in the training workshop, you will receive practical, hands-on training in the operation of both high and low voltage switchgear.

The course aims to enable you to familiarise yourself with operational procedures and potential physical constraints associated with high voltage power systems, prior to receiving full authorisation training.

The following subjects are covered as part of this course:

- Operational Procedures
- Single End Drive Motor Isolations
- Transformer Isolations
- Ring Feeder Isolations
- Circuit Main Earth Application Procedures
- Additional Earth Application Procedures
- Electrical Safety Documents
- Key Safes and Multi Hasp Locking (Multihasp) Systems
- Abridged High Voltage Safety Rules
- Course Review

Need Help?

Just give us a call on 01642 987 978 and our training team will be happy to answer all of your questions.

3 Day Course

Price: £699.00+VAT (including assessment costs) - per person

Course Code: HVSO6

Location: Stockton

Practical Introduction to the Safe Operation of High/Low Voltage Switchgear

3 Day Course

Price: £699.00+VAT (including assessment costs) - per person

Location: Stockton

What Assessments Are There?

There are no assessments on this course

Are There Any Entry Requirements?

Although there are no specific requirements for this course and it is suitable for both electrical and non-electrical personnel, an understanding of the basics of electricity and electrical systems would be an advantage.

Anyone attending training should also have a good level of both spoken and written English.

Are There Any Reading Materials Required?

There are no peripheral reading materials required for this course.

What Certification Will I Receive from This Course?

You will receive a PASS Certificate of Attendance after successful completion of this course.

Additional Information

If you are interested in this course and would like to find out more about the content, other courses on offer or would like to find out more information about PASS itself and the facilities available to you, contact the training centre where an advisor will be happy to answer all your questions.

Don't forget: lunch is provided on all our courses along with coffee, tea and juice.
