

OVER 20 COURSES  
TO ADVANCE &  
ENHANCE YOUR  
ELECTRICAL CAREER

# City & Guilds 2392-10

Level Two Certificate in Fundamental Inspection, Testing and Initial Verification

If a learner is new to the industry or has a basic level of electrical experience in the inspection and testing of electrical installations, this course will be a great benefit to their continuing career development.

It is a course that can be used as a first step towards the more in-depth 2391-10 and can also be used in combination with a pass from the Part P course to allow self certification of installation work.

## Who is the Course Designed For?

The course has been designed for anyone wanting to carry out electrical inspection, testing and initial verification of domestic electrical installations.

It is suitable for those with existing electrical knowledge and for those working in the industry who have not yet got electrical qualifications.

## What Does the Course Cover?

The City and Guilds Certification in Fundamental Inspection, Testing and Initial Verification course aims to provide learners with the necessary skills for practical inspection and testing of newly installed circuits.

## The course covers the following subjects:

- Practical and theoretical learning relating to the inspection and testing of new fixed wiring in electrical installations,
- Safe working and isolation practices,
- Use of test equipment,
- Associated inspection and testing documentation.

Providing a solid foundation to all learners, this course makes any subsequent training easier to digest if the learner successfully passes and understands the content.

**Final City & Guilds Registration Date Is 31 December 2012**

### City & Guilds Accredited Centre

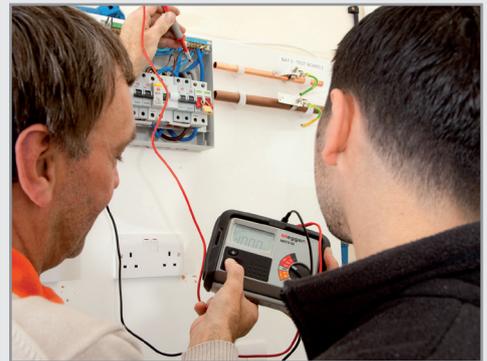

City & Guilds are represented in over 100 countries worldwide as a vocational awarding body for qualifications.

## Did You Know?

City and Guilds introduced the 2392-10 course because of the high failure rates on the 2391-10, due to the intensive nature of that course. Therefore, this course is for those wanting to carry out inspection in low voltage single phase domestic applications.

## Five Day Course

**Price:** £555+VAT (per person)

**Location:** Stockton, Watford (London)

## Fundamental Inspection, Testing and Initial Verification

---

### Five Day Course

**Price:** £555+VAT (per person)

**Location:** Stockton, Watford (London)

### What Assessments Are There?

This course concludes with a 50 question online examination and a two hour practical test.

Both theoretical and practical assessments require a pass mark to gain the course qualification.

### Are There Any Entry Requirements?

There are no formal entry requirements for this course but candidates must have the potential to gain the qualification and have a good knowledge of electrics or experience in electrical installation work.

The 2382-12 17th Edition course, although not necessary, is strongly recommended for this course as it would help with knowledge of the Wiring Regulations.

### What Are The Reading Requirements?

Learners are required to bring with them a current copy of;

- IET 17th Edition Wiring Regulations, Amendment No. 1,
- IET On-site Guide, Amendment No. 1.

### Final Thought

If you are interested in this course and would like to find out more about the content, other courses on offer or would like to find out more information about PASS itself and the facilities available to you, contact the training centre where an advisor will be happy to answer all your questions.

**Don't forget:** lunch is provided on all our courses along with Coffee, Tea and Juice.
