

NEBOSH National Construction Certificate

In Occupational Health and Safety

An essential health and safety course for supervisors, managers and other employees working within the construction sector.

Health and safety within construction sites, which are considered to be high risk environments, is essential. The NEBOSH Construction Certificate is suitable for any person responsible for health and safety within these environments, delivering the necessary knowledge and training you'll need to ensure the safety of others in the workplace.

Who is the Course Suitable For?

Anybody who works within the construction sector, regardless of their role, should be aware of the hazards associated with construction sites and onsite work.

This course is open to anyone who works within the construction industry and is a must for anyone wanting to remain safe at work.

What's Covered in the Course?

During the National Construction Certificate course, you'll learn the main legal requirements concerning health and safety in construction work within the UK. This includes identification and control of construction workplace hazards and practically applying this to ensure safety within construction work.

There are three modules included: Management of National Health and Safety (NGC1), Managing and Controlling Hazards in Construction Activities (NCC1) and a Construction Health and Safety Practical Application (NCC2).

Specific elements covered as part of this course include:

- Foundations in health and safety - planning, doing, checking and acting
- Construction law and management
- Electrical and fire safety
- Vehicle and plant movement - hazards and risk control
- Chemical and biological health
- Working at height risk/control
- Excavation work and confined space risk/control
- Demolition and deconstruction risk/control

NEBOSH Accredited Centre

The National Examination Board in Occupational Safety and Health is a globally-recognised health and safety training provider.

Did You Know?

This course is also available for non-construction workers! See the National General certificate course for more.

NEBOSH National Construction Certificate

In Occupational Health and Safety

Twenty-Two Day Course

Price: £1995+VAT (per person)

Location: Stockton

What Assessments Are There?

At the end of each of the first two modules you'll take a two hour written exam based upon the course content.

The final module is an examination in itself - you'll take part in a health and safety practical application and be expected to use the skills you've gained so far during the course.

Are There Any Entry Requirements?

No - this course is open to absolutely everyone in the construction sector.

What Are The Reading Requirements?

There are no reading requirements for this course, although a basic understanding of health and safety would be beneficial.

Additional Information

If you are interested in this course and would like to find out more about the content, other courses on offer or would like to find out more information about PASS itself and the facilities available to you, contact the training centre where an advisor will be happy to answer all your questions.

Don't forget: lunch is provided on all our courses along with coffee, tea and juice.
