

Authorised Person Training - Limited Operation of HV Power Systems

At PASS training we are committed to delivering training to the highest standards. We value customer feedback and use it to continually refine our courses. Having trained hundreds of candidates, our programs are designed to be professional and led by experienced tutors. Our goal is to equip our customers with the knowledge and skills to achieve officially recognized qualifications across a range of disciplines.

Our trainers deliver courses in a clear, approachable, and enjoyable way, ensuring you have the best possible learning experience. Every trainer is fully qualified and accredited, and they work closely with you throughout the course to ensure you gain the knowledge you need.

Course Overview

Train to be an authorised person responsible for limited switching operations in high voltage environments with our HV authorised person training course. Our Limited Operation of High Voltage Power Systems course will introduce you to the concept of electrical power systems, giving you the knowledge and training you need to enter substations/switchrooms to carry out restricted switching operations and to monitor the performance/condition of the system in a safe and competent manner.

Our high voltage training tutors will also give you an introduction to limited safety document issuing responsibilities.

Course Details

Who is this Course Suitable For?

This course is aimed at those who require competency in the safe operation of HV power systems as part of their job role. The course can be taken by both electrical and non electrical personnel who will interact with switchrooms.

Course Aim

To comply with safety requirements and be able to carry out limited HV switching operations in HV switching rooms up to and including 15kV suitable for an AP and issue relevant documents.

What Does the Course Cover?

- ▶ Safety Requirements
- ▶ Electrical Hazards and Precautions
- ▶ Operational and Safety Features of Switchgear
- ▶ Electricity at Work Regulations 1989
- ▶ Limited Operational Procedures
- ▶ High Voltage Safety Rules
- ▶ The Role of Protection Relays
- ▶ Practical Switching Exercise
- ▶ Case Studies
- ▶ Course Review

Entry Requirements

A basic understanding of electricity and high voltage equipment is beneficial. Anyone attending training should also have a good level of both spoken and written English.

Assessments

You'll be expected to complete a written examination as well as take part in a practical examination during this course.

Course Certification

Upon the successful completion of this course delegates will receive a certificate of competency accredited by City and Guilds.

For candidates who decide not to undertake the assessments or are unsuccessful when taking the assessments, you will receive a certificate of attendance instead.

Course Materials

Delegates can bring with them any materials used by their own employer/company, so that they are able to use real life examples and gain insight into how their existing protocol fits into the context of the course.
