

Wind Turbine SAP Training - Safe Switching of Power Distribution Networks

At PASS training we are committed to delivering training to the highest standards. We value customer feedback and use it to continually refine our courses. Having trained hundreds of candidates, our programs are designed to be professional and led by experienced tutors. Our goal is to equip our customers with the knowledge and skills to achieve officially recognized qualifications across a range of disciplines.

Our trainers deliver courses in a clear, approachable, and enjoyable way, ensuring you have the best possible learning experience. Every trainer is fully qualified and accredited, and they work closely with you throughout the course to ensure you gain the knowledge you need.

Course Overview

Become a senior authorised person (SAP) qualified to carry out safe switching of power distribution networks on wind turbines situated both on and offshore.

The course takes place at our dedicated high voltage training centre in Stockton-On-Tees. Here, you will receive authentic simulations of the electrical systems which power wind turbines use and be instructed on how to perform safe switching of these systems.

City & Guilds | Accredited Programme

Key Information

Duration: 5 Day

Price: £1295.00 + VAT

Booking Code: HWWP1

Location: Stockton

Course Details

Who is this Course Suitable For?

You should be an engineer, supervisor or technician working within the renewable energy industry, you may already be an AP or have a high level of competency with responsibility for the electrical operation of on/offshore wind turbines.

Course Aim

Using a combination of both theoretical and practical instructions, our tutors will teach you safe working procedures and best practices in relation to wind turbine power distribution systems, ensuring you can work in a safe, competent manner.

What Does the Course Cover?

- ▶ Electrical Hazards and Precautions
- ▶ PPE Requirements
- ▶ Electricity at Work Regulations 1989
- ▶ History of Wind Power Utilisation
- ▶ Wind Turbine Power Generation
- ▶ Switchgear Basics and General Principles
- ▶ Operational and Safety Features of Switchgear
- ▶ Electrical Safety Documents
- ▶ Key Safes and Multihemps
- ▶ Operational Procedures
- ▶ Practical Switching Exercises
- ▶ Issue and Control of Safety Documentation
- ▶ Introduction to Partial Discharge Detection
- ▶ Wind Turbine HV Safety Rules
- ▶ Wind Turbine Switchgear Safety

Entry Requirements

Prior knowledge of inspection, operation, maintenance and repair of HV power systems is essential. Anyone attending training should also have a good level of both spoken and written English.

Assessments

Written examination and practical examination.

Course Certification

You will receive a PASS Certificate of Competency in Wind Turbine SAP Training: Safe Switching of Power Distribution Networks, accredited by City and Guilds. (Certificate of Attendance gained for those who do not pass the tests)

Find Out More

If you are interested in this course and would like to find out more about the content, or the facilities available to you, then contact the training centre. We are always happy to answer all your questions. Or visit the course pages on our dedicated electrical training website:
