

Labourer CSCS Card Package

The easy way to get your green Labourer's CSCS card so you can work onsite! This comprehensive package includes a health and safety training course, your CSCS examination fees and we'll also apply for your CSCS card for you when

If you want to work as a labourer on a construction site, many employers won't even consider you for work unless you have a valid, current CSCS card.

CSCS cards are widely regarded within the construction industry as one of the best ways to prove you have the health and safety training needed to work safely on site. It's highly recommended that any labourer, or anyone completing other jobs on a construction site, should have their own CSCS card.

To get a Labourer CSCS card, you must do three things:

- Complete an approved health and safety training course for the construction sector
- Take the CITB Health and Safety examination
- Apply for the card through the CITB

Our Labourer CSCS Card course package includes all three of these for one reduced cost. Taking place over just a single day at our Stockton-on-Tees training venue in the North East, you can take your health and safety course, take the exam and we'll then apply for your CSCS card for you, which will be posted out by the CITB to your house or place of work.

CITB Accredited Centre

PASS is an accredited provider of training from the CITB, the leadership organisation for the UK construction industry.

1 Day Course Package
