

CoDNCO1 - Domestic to Commercial Heating Changeover (includes TCP1A, ICPN1, CIGA1, CORT1, CDGA1)

At PASS training we are committed to delivering training to the highest standards. We value customer feedback and use it to continually refine our courses. Having trained hundreds of candidates, our programs are designed to be professional and led by experienced tutors. Our goal is to equip our customers with the knowledge and skills to achieve officially recognized qualifications across a range of disciplines.

Our trainers deliver courses in a clear, approachable, and enjoyable way, ensuring you have the best possible learning experience. Every trainer is fully qualified and accredited, and they work closely with you throughout the course to ensure you gain the knowledge you need.

Course Overview

CoDNCO1 - Domestic to Commercial Heating Changeover course is designed for experienced gas engineers who wish to undertake the training in order to transition into the commercial sector.

The training provides candidates with a thorough understanding of the differences between Domestic and Commercial Core Gas Safety, and how these differences affect testing, gas detection, strength testing, and system purging.

This course is designed for experienced professionals who already hold the Core Domestic Gas Safety (CCN1) qualification and are looking to expand their expertise into the field of commercial gas heating systems.

Re-assessment

Duration: 3 Days
Price: £1250.00 + VAT
Booking Code: GASTRA-CoDNCO1/R

Location: Welwyn Garden City

Max Delegates: 5

Course Details

Course Aim

The CoDNCO1 course is designed to equip gas engineers with a comprehensive understanding of the core principles necessary to safely transition from domestic to commercial gas work. This qualification is essential for those seeking to expand their skill set and work confidently on larger, more complex commercial gas installations.

What Does the Course Cover?

- ▶ Gas Safety Regulations
- ▶ Combustion
- ▶ Flueing
- ▶ Let-by, strength & tightness testing
- ▶ Pressure regulators
- ▶ Gas controls
- ▶ Unsafe situations
- ▶ Emergency Actions
- ▶ Ventilation
- ▶ Gas pipework
- ▶ Re-establishing gas supplies
- ▶ Gas rates & pressures
- ▶ Emergency valves

As part of the CoDNCO1 course, training includes the modules:

TPCP1A – Tightness Testing & Direct Purging of Installation Pipework

ICPN1 – Commercial First Fix Gas Pipework

CIGA1 – Commercial Indirect Fired Gas Appliances

CORT1 – Commercial Radiant Tube & Plaque Heaters

CDGA1 – Commercial Direct Fired Gas Appliances

Entry Requirements

Initial: Candidates have to be registered with Gas Safe Register and must currently hold Core Domestic Natural Gas Safety (CCN1).

Re-assessment: To undertake re-assessment, operatives must complete the course no more than 12 months after the expiry date of their existing qualification.

Assessments

The CoDNCO1 course involves assessment carried out using a variety of methods including multiple choice, short written response, scenario questions and observed practical tasks.

Course Certificate

Upon successful completion, candidates receive a certificate from LCL Awards. This certification is valid for 5 years and is recognised by the Gas Safe Register, enabling operatives to work legally on CoDNCO1- Domestic to Commercial Heating Changeover and the additional modules passed during assessment.
